

Capital Harness XC (2 days)

Course Overview

The Capital Harness XC course introduces you to the basic and more complex functionality within the Capital Harness XC product. This tool provides a seamless transition of data from Capital Logic or Integrator into Capital Harness XC.

Hands-on lab exercises will reinforce lecture and discussion topics under the guidance of our industry expert instructors.

You Will Learn How To

- Create Harness Designs using Capital Harness XC design tools
 - Graphical representation of harness designs
 - Component handling
 - Design processing and calculations
 - Report Generation

Hands-On Labs

Throughout this course, extensive hands-on lab exercises provide you with practical experience using Capital Harness XC software. Hands-on lab topics include:

- Creation of a harness
- Creation of a composite harness
- Calculations and processing of harnesses

Prerequisites

- Familiarity with concepts of Capital Harness systems
- If users wish to use the XC tool in conjunction with the Logic or Integrator tools, these courses must already have been attended.

Key Topics

- Creation of a harness
- Calculations and analysis of harness log files
